

PUBLICATIONS

Jean-François Le Gall

1. Temps locaux et équations différentielles stochastiques. *Thèse de troisième cycle*, Université Pierre et Marie Curie (Paris VI), Paris, 1982.
2. Applications du temps local aux équations différentielles stochastiques unidimensionnelles. *Séminaire de Probabilités XVII. Lecture Notes Math.* **986**, 15-31. Springer, Berlin, 1983.
3. Sur l'équation stochastique de Tsirelson. *Séminaire de Probabilités XVII. Lecture Notes Math.* **986**, 81-88. Springer, Berlin, 1983. (with **M. Yor**)
4. Sur la mesure de Hausdorff des points multiples du mouvement brownien. *C. R. Acad. Sci. Paris, Série I* **299**, 627-630 (1984)
5. One-dimensional stochastic differential equations involving the local times of the unknown process. *Stochastic Analysis. Lecture Notes Math.* **1095**, 51-82. Springer, Berlin 1985.
6. Sur le temps local d'intersection du mouvement brownien plan et la méthode de renormalisation de Varadhan. *Séminaire de Probabilités XIX. Lecture Notes Math.* **1123**, 314-331. Springer, Berlin 1985.
7. Sur la mesure de Hausdorff de la courbe brownienne. *Séminaire de Probabilités XIX. Lecture Notes Math.* **1123**, 297-313. Springer, Berlin 1985.
8. Un théorème central limite pour le nombre de points visités par une marche aléatoire plane récurrente. *C. R. Acad. Sci. Paris, Série I* **300**, 505-508 (1985)
9. Propriétés d'intersection des marches aléatoires. *C. R. Acad. Sci. Paris, Série I* **301**, 387-390 (1985)
10. Etude asymptotique de certains mouvements browniens complexes avec drift. *Probab. Th. Rel. Fields* **71**, 183-229 (1986) (with **M. Yor**)
11. Sur la saucisse de Wiener et les points multiples du mouvement brownien. *Ann. Probab.* **14**, 1219-1244 (1986)
12. Propriétés d'intersection des marches aléatoires I. Convergence vers le temps local d'intersection. *Comm. Math. Phys.* **104**, 471-507 (1986)

13. Propriétés d'intersection des marches aléatoires II. Etude des cas critiques. *Comm. Math. Phys.* **104**, 509-528 (1986)
14. Une approche élémentaire des théorèmes de décomposition de Williams. *Séminaire de Probabilités XX. Lecture Notes Math.* **1204**, 447-464. Springer, Berlin 1986.
15. Mouvement brownien, cônes et processus stables. *C. R. Acad. Sci. Paris, Série I* **302**, 641-643 (1986)
16. Excursions browniennes et carrés de processus de Bessel. *C. R. Acad. Sci. Paris Série I* **303**, 73-76 (1986) (with **M. Yor**)
17. Le comportement du mouvement brownien entre les deux instants où il passe par un point double. *J. Funct. Anal.* **71**, 246-262 (1987)
18. Etude asymptotique des enlacements du mouvement brownien autour des droites de l'espace. *Probab. Th. Rel. Fields* **74**, 617-635 (1987) (with **M. Yor**)
19. Mouvement brownien, cônes et processus stables. *Probab. Th. Rel. Fields* **76**, 587-627 (1987)
20. The packing measure of planar Brownian motion. *Seminar on Stochastic Processes 1986*, 139-147. Birkhäuser, Boston 1987. (with **S. J. Taylor**)
21. The exact Hausdorff measure of Brownian multiple points. *Seminar on Stochastic Processes 1986*, 107-137. Birkhäuser, Boston 1987.
22. Temps locaux d'intersection et points multiples des processus de Lévy. *Séminaire de Probabilités XXI. Lecture Notes Math.* **1247**, 341-374. Springer, Berlin 1987.
23. Un processus qui ressemble au pont brownien. *Séminaire de Probabilités XXI. Lecture Notes Math.* **1247**, 270-275. Springer, Berlin 1987. (with **P. Biane** and **M. Yor**)
24. Temps locaux d'intersection renormalisés et développement asymptotique du volume de la saucisse de Wiener plane. *C. R. Acad. Sci. Paris, Série I* **304**, 339-342 (1987)
25. Some intersection properties of Brownian motion and random walks. *Proceedings of the First World Congress of the Bernoulli Society (Taschkent 1986)*, Vol. 1, pp. 547-556. V.N.U. Science Press, Utrecht 1987.
26. Fluctuation results for the Wiener sausage. *Ann. Probab.* **16**, 991-1018 (1988)
27. Sur une conjecture de M. Kac. *Probab. Th. Rel. Fields* **78**, 389-402 (1988)
28. Sur les fonctions polaires pour le mouvement brownien. *Séminaire de Probabilités XXII. Lecture Notes Math.* **1321**, 186-189. Springer, Berlin 1988.
29. Propriétés trajectoires d'une classe de processus de diffusion hypoelliptiques. *C. R. Acad. Sci. Paris, Série I* **307**, 1005-1010 (1988) (with **M. Chaleyat-Maurel**)

30. Multiple points for Lévy processes. *Ann. Probab.* **17**, 503-515 (1989) (with **J. Rosen** and **N.R. Shieh**)
31. The exact Hausdorff measure of Brownian multiple points II. *Seminar on Stochastic Processes 1988*, 193-197. Birkhäuser, Boston 1989.
32. Introduction au mouvement brownien. *Gazette des Mathématiciens* **40**, 43-64 (1989)
33. Marches aléatoires, mouvement brownien et processus de branchement. *Séminaire de Probabilités XXIII. Lecture Notes Math.* **1372**, 258-274. Springer, Berlin 1989.
34. Green function, capacity and sample path properties for a class of hypoelliptic diffusion processes. *Probab. Th. Rel. Fields* **83**, 219-264 (1989) (with **M. Chaleyat-Maurel**)
35. Une construction trajectorielle de certains processus de Markov à valeurs mesures. *C. R. Acad. Sci. Paris, Série I* **308**, 533-538 (1989)
36. Wiener sausage and self-intersection local times. *J. Funct. Anal.* **88**, 299-341 (1990)
37. Enlacements du mouvement brownien autour des courbes de l'espace. *Trans. Amer. Math. Soc.* **317**, 687-721 (1990) (with **M. Yor**)
38. On polar sets for hypoelliptic diffusion processes. *Stochastic Analysis and Related Topics. Lecture Notes Math.* **1444**, 204-212. Springer, Berlin 1990. (with **M. Chaleyat-Maurel**)
39. The range of stable random walks. *Ann. Probab.* **19**, 650-705 (1991) (with **J. Rosen**)
40. Brownian excursions, trees and measure-valued branching processes. *Ann. Probab.* **19**, 1399-1439 (1991)
41. On the connected components of the complement of a two-dimensional Brownian path. *Random Walks, Brownian Motion and Interacting Particle Systems*, pp.323-338. Birkhäuser, Boston 1991.
42. Points cônes du mouvement brownien plan, le cas critique. *Probab. Th. Rel. Fields* **93**, 231-247 (1992) (with **T. Meyre**)
43. Some properties of planar Brownian motion. In: *Ecole d'été de probabilités de Saint Flour XX - 1990. Lecture Notes Math.* **1527**, 111-235. Springer, Berlin 1992.
44. The geometry of the Brownian curve. *Bull. Sci. Math.* **117**, 91-106 (1993) (with **B. Duplantier**, **G.F. Lawler** and **T.J. Lyons**)
45. A class of path-valued Markov processes and its connections with superprocesses. *Probab. Th. Rel. Fields* **95**, 25-46 (1993)
46. The uniform random tree in a Brownian excursion. *Probab. Th. Rel. Fields* **96**, 369-383 (1993)

47. Les solutions positives de $\Delta u = u^2$ dans le disque unité. *C.R. Acad. Sci. Paris* **317**, Série I, 873-878 (1993)
48. Mean curvature and the heat equation. *Math. Z.* **215**, 437-464 (1994) (with **M. van den Berg**)
49. Hitting probabilities and potential theory for the Brownian path-valued process. *Ann. Inst. Fourier* **44**, 277-306 (1994)
50. A path-valued Markov processes and its connections with partial differential equations. In: *Proceedings First European Congress of Mathematics, Vol.II*, pp.185-212. Birkhäuser, Boston 1994.
51. A lemma on super-Brownian motion with some applications. In: *The Dynkin Festschrift*, M.I. Freidlin ed., pp.237-251. Birkhäuser, Boston 1994.
52. Sur la mesure de sortie du super mouvement brownien. *Probab. Th. Rel. Fields* **99**, 251-275 (1994) (with **R. Abraham**)
53. Exponential moments for the renormalized self-intersection local time of planar Brownian motion. *Séminaire de Probabilités XXVIII. Lecture Notes Math.* **1583**, 172-180. Springer, Berlin 1994.
54. The Brownian path-valued process and its connections with partial differential equations. Stochastic Analysis (Cranston, Pinsky eds). Proceedings of Symposia in Pure Mathematics, vol. 57, pp.427-437. AMS, Providence 1995.
55. A new approach to the single-point catalytic super-Brownian motion. *Probab. Th. Rel. Fields* **102**, 63-82 (1995) (with **K. Fleischmann**)
56. The Brownian snake and solutions of $\Delta u = u^2$ in a domain. *Probab. Th. Rel. Fields* **102**, 393-432 (1995)
57. Some new classes of exceptional times of linear Brownian motion. *Ann. Probab.* **23**, 1605-1626 (1995) (with **S. Aspandiiarov**)
58. The Hausdorff measure of the support of two-dimensional super Brownian motion. *Ann. Probab.* **23**, 1719-1747 (1995) (with **E. Perkins**)
59. The packing measure of the support of super-Brownian motion. *Stoch. Process. Appl.* **59**, 1-20 (1995) (with **E. Perkins** and **S.J. Taylor**)
60. Super-Brownian motions in catalytic media. In: *Branching Processes*, C.C. Heyde ed. *Lecture Notes in Statistics* **99**, pp. 122-134. Springer, Berlin 1995. (with **D. Dawson** and **K. Fleischmann**)
61. Arbres aléatoires et processus de Lévy. *C.R. Acad. Sci. Paris, Série I* **321**, 1241-1244 (1995) (with **Y. Le Jan**)

62. A probabilistic approach to the trace at the boundary for solutions of a semilinear parabolic partial differential equation. *J. Appl. Math. Stoch. Anal.* **9**, 399-414 (1996)
63. A probabilistic Poisson representation for solutions of $\Delta u = u^2$ in a planar domain. *Comm. Pure Appl. Math.* **50**, 69-103 (1997)
64. Spatial branching processes and subordination. *Canadian Math. J.* **49**, 24-54 (1997) (with **J. Bertoin** and **Y. Le Jan**)
65. Wiener's test for super-Brownian motion and the Brownian snake. *Probab. Th. Rel. Fields* **108**, 103-129 (1997) (with **J.S. Dhersin**)
66. Marches aléatoires auto-évitantes et mesures de polymère. *Séminaire de Probabilités XXXI. Lecture Notes Math.*, **1655**, 103-112. Springer, Berlin 1997.
67. Branching processes in Lévy processes: The exploration process. *Ann. Probab.* **26**, 213-252 (1998). (with **Y. Le Jan**)
68. Kolmogorov's test for super-Brownian motion. *Ann. Probab.* **26**, 1041-1056 (1998) (with **J.S. Dhersin**)
69. Branching processes in Lévy processes: Laplace functionals of snakes and superprocesses. *Ann. Probab.* **26**, 1407-1432 (1998) (with **Y. Le Jan**)
70. Branching processes, random trees and superprocesses. Proceedings of the International Congress of Mathematicians, Berlin 1998. Documenta Mathematica.
71. The Hausdorff measure of the range of super-Brownian motion. In: *Perplexing Problems in Probability. Festschrift in Honor of Harry Kesten*, M. Bramson, R. Durrett eds, pp. 285-314. Birkhäuser, 1999.
72. *Spatial Branching Processes, Random Snakes and Partial Differential Equations*. Lectures in Mathematics ETH Zürich. Birkhäuser, 1999.
73. Dynkin's contributions to superprocesses and partial differential equations. In: *Selected papers of E.B. Dynkin with commentary*, pp. 781-791. American Mathematical Society, Providence 2000
74. The Bolthausen-Sznitman coalescent and the genealogy of continuous-state branching processes. *Probab. Th. Rel. Fields* **117**, 249-266 (2000) (with **J. Bertoin**)
75. Processus de branchement, arbres et superprocessus. In: *Développement des mathématiques 1950-2000*, pp. 763-793. Birkhäuser 2000.
76. *Random trees and spatial branching processes*. Maphysto Lecture Notes Series (University of Aarhus), vol. 9 (80 pp.), 2000.
Available at <http://www.maphysto.dk/publications/MPS-LN/2000/9.pdf>
77. Super-Brownian limits of voter model clusters. *Ann. Probab.* **29**, 1001-1032 (2001) (with **M. Bramson** and **T. Cox**)

78. Super-Brownian motion with reflecting historical paths. *Probab. Th. Rel. Fields* **121**, 447-491 (2001) (with **K. Burdzy**)
79. Exposants critiques pour le mouvement brownien et les marches aléatoires. Séminaire Bourbaki, Novembre 1999. *Astérisque* **276**, 29-51 (2002)
80. *Random Trees, Lévy Processes and Spatial Branching Processes*. *Astérisque* **281** (2002) (with **T. Duquesne**)
81. Stochastic flows associated to coalescent processes. *Probab. Th. Rel. Fields* **126**, 261-288 (2003) (with **J. Bertoin**)
82. Stochastic integral representation and regularity of the density for the exit measure of super-Brownian motion. *Ann. Probab.* **33**, 194-222 (2005) (with **L. Mytnik**)
83. Probabilistic and fractal aspects of Lévy trees. *Probab. Th. Rel. Fields* **131**, 553-603 (2005) (with **T. Duquesne**)
84. Stochastic flows associated to coalescent processes II: Stochastic differential equations. *Annales Inst. H. Poincaré Probab. Stat.* **41**, 307-333 (2005) (with **J. Bertoin**)
85. Random trees and applications. *Probability Surveys* **2**, 245-311 (2005)
86. Conditioned Brownian trees. *Annales Inst. H. Poincaré Probab. Stat.* **42**, 455-489 (2006) (with **M. Weill**)
87. A conditional limit theorem for tree-indexed random walk. *Stochastic Process. Appl.* **116**, 539-567 (2006)
88. Random real trees. *Annales Fac. Sci. Toulouse*, vol. XV, 35-62 (2006)
89. On the occupation measure of super-Brownian motion. *Electronic Comm. Probab.* **11**, 252-265 (2006) (with **M. Merle**)
90. Stochastic flows associated to coalescent processes III: Infinite population limits. *Illinois J. Math.* **50**, 147-181 (2006) (with **J. Bertoin**)
91. The Hausdorff measure of stable trees. *Alea* **1**, 393-415 (2006) (with **T. Duquesne**)
92. Probabilistic approach to a class of semilinear partial differential equations. In: “Perspectives in Nonlinear Partial Differential Equations: In honor of Haim Brezis”, pp. 255-272. *Contemporary Mathematics*, AMS 2007.
93. The topological structure of scaling limits of large planar maps. *Inventiones Math.* **169**, 621-670 (2007)
94. Les travaux de Wendelin Werner. *Gazette des Mathématiciens* **112**, 7-17 (2007)
95. Brownian motion and stochastic processes. In the volume *Princeton Companion to Mathematics*, T. Gowers ed., Princeton University Press 2008.

96. Scaling limits of bipartite planar maps are homeomorphic to the 2-sphere. *Geomet. Funct. Anal.* **18**, 893-918 (2008) (with **F. Paulin**)
97. The continuous limit of large random planar maps. Fifth Colloquium on Mathematics and Computer Science. *DMTCS proceedings AI*, 1-18 (2008) (electronic)
98. On the re-rooting invariance property of Lévy trees. *Electronic Comm. Probab.* **14**, 317-326 (2009) (with **T. Duquesne**)
99. Large random planar maps and their scaling limits. Proceedings 5th European Congress of Mathematics (Amsterdam 2008) pp. 253-276. European Math. Society, Zürich, 2010.
100. Geodesics in large planar maps and in the Brownian map. *Acta Math.* **205**, 287-360 (2010)
101. On the scaling limit of random planar maps with large faces. *Proceedings XVIth International Congress on Mathematical Physics*, 470-474. World Sci. Publ., Hackensack, 2010. (with **G. Miermont**)
102. Itô's excursion theory and random trees. *Stoch. Process. Appl.* **120** (2010), 721-749.
103. Scaling limits for the uniform infinite quadrangulation. *Illinois J. Math.* **54**, 1163-1203 (2010) (with **L. Ménard**)
104. Scaling limits of random planar maps with large faces. *Ann. Probab.* **39**, 1-69 (2011) (with **G. Miermont**)
105. Random recursive triangulations of the disk via fragmentation theory. *Ann. Probab.* **39**, 2224-2270 (2011) (with **N. Curien**)
106. Escape probabilities for branching Brownian motion among mild obstacles. *J. Theoret. Probab.* **25**, 505-535 (2012) (with **A. Véber**)
107. Scaling limits of random trees and planar maps. Lecture notes from the 2010 Clay Mathematical Institute Summer School (Buzios). Clay Mathematics Proceedings, vol. **15**, pp. 155-211 (2012) (with **G. Miermont**)
108. The Brownian cactus I. Scaling limits of discrete cactuses. *Annales Inst. H. Poincaré Probab. Stat.* **49**, 340-373 (2013) (with **N. Curien** and **G. Miermont**)
109. Uniqueness and universality of the Brownian map. *Ann. Probab.* **41**, 2880-2960 (2013)
110. *Mouvement Brownien, Martingales et Calcul Stochastique*. Mathématiques et Applications, vol.71. Springer 2013.
111. Quadrangulations with no pendant vertices. *Bernoulli* **19**, 1150-1175 (2013) (with **J. Beltran**)
112. Paul Lévy et le mouvement brownien. *ESAIM Probab. Stat.* **17**, 795-801 (2013)

113. Random geometry on the sphere. *Proceedings International Congress of Mathematicians (Seoul 2014)*, vol.I, pp. 421-442.
114. The Brownian plane. *J. Theoret. Probab.* **27**, 1249-1291 (2014) (with **N. Curien**)
115. The Brownian map: A universal limit for random planar maps. *Proceedings XVIIth International Congress on Mathematical Physics*, 420-428. World Sci. Publ., Hackensack, 2014.
116. The Brownian cactus II. Upcrossings and local times of super-Brownian motion. *Probab. Th. Rel. Fields* **162**, 199-231 (2015)
117. The range of tree-indexed random walk in low dimensions. *Ann. Probab.* **43**, 2701-2728 (2015) (with **S. Lin**)
118. Bessel processes, the Brownian snake and super-Brownian motion. In: *In Memoriam Marc Yor, Séminaire de Probabilités XLVII. Lecture Notes Math.* **2137**. Springer, Berlin 2015.
119. The range of tree-indexed random walk. *J. Inst. Math. Jussieu* **15**, 271-317 (2016) (with **S. Lin**)
120. *Brownian Motion, Martingales, and Stochastic Calculus*. Graduate Texts in Mathematics, vol.274. Springer 2016.
121. The hull process of the Brownian plane. *Probab. Th. Rel. Fields* **166**, 187-231 (2016) (with **N. Curien**)
122. The harmonic measure of balls in random trees. *Ann. Probab.* **45**, 147-209 (2017) (with **N. Curien**)
123. Scaling limits for the peeling process on random maps. *Annales Inst. H. Poincaré Probab. Stat.* **53**, 322-357 (2017) (with **N. Curien**)
124. Excursion theory for Brownian motion indexed by the Brownian tree. *J. Eur. Math. Soc. (JEMS)* **20**, 2951-3016 (2018) (with **C. Abraham**)
125. Subordination of trees and the Brownian map. *Probab. Th. Rel. Fields* **117**, 819-864 (2018)
126. First-passage percolation and local modifications of distances in random triangulations. *Ann. Sci. Éc. Norm. Supér.* **52**, 631-701 (2019) (with **N. Curien**)
127. Brownian disks and the Brownian snake. *Annales Inst. H. Poincaré Probab. Stat.* **55**, 237-313 (2019)
128. Separating cycles and isoperimetric inequalities in the uniform infinite planar quadrangulation. *Ann. Probab.* **47**, 1498-1540 (2019) (with **T. Lehéricy**)
129. Brownian geometry. *Japan J. Math.* **14**, 135-174 (2019)

130. Growth-fragmentation processes in Brownian motion indexed by the Brownian tree. *Ann. Probab.* **48**, 1742-1784 (2020) (with **A. Riera**)
131. Some explicit distributions for Brownian motion indexed by the Brownian tree. *Markov Process. Related Fields* **26**, 659-686 (2020) (with **A. Riera**)
132. The Brownian disk viewed from a boundary point. *Annales Inst. H. Poincaré Probab. Stat.* **58**, 1091-1119 (2022)
133. Spine representations for non-compact models of random geometry. *Probab. Th. Rel. Fields* **181**, 571-645 (2021) (with **A. Riera**)
134. Geodesic stars in random geometry. *Ann. Probab.* **50**, 1013-1058 (2022)
135. The volume measure of the Brownian sphere is a Hausdorff measure. *Electron. J. Probab.* **27**, article no.113, 1-28 (2022)
136. *Measure Theory, Probability and Stochastic Processes*. Graduate Texts in Mathematics, vol.295. Springer 2022.
137. The Markov property of local times of Brownian motion indexed by the Brownian tree. *Ann. Probab.* **52**, 188-216 (2024)
138. Spatial Markov property in Brownian disks. (To appear in *Ann. Inst. Henri Poincaré Probab. Stat.*, with **A. Riera**)
139. A stochastic differential equation for local times of super-Brownian motion. (To appear in *Ann. Probab.*, with **E. Perkins**)
140. Peeling the Brownian half-plane. (To appear, with **A. Riera**)
