#####  File  "lar_ral_standard";

## The regular bisymmetrals lar, rap are derived from the exceptional bisymmetrals pal, par via the relation:

## gari(pal,lar)=par
## gari(par,ral)=pal
## gari(lar,ral)=id

## For r= 4,6,8,10 the present file gives:

## selar_r = eselar_r/ratiolar_r = coefficients of lar in the standard basis of Flex(Pa)
## seral_r = eseral_r/ratioral_r   = coefficients of ral in the standard basis of Flex(Pa)

## For compactness, the sequences printed here are eselar_r and eseral_r,
## after reduction to the common denominators ratiolar_r=ratioral_r
