

# Amaury FRESLON

*Citizenship : French*

*Married, one child*

*Born 29/10/1987*

amaury.freslon@math.u-psud.fr

<http://www.math.u-psud.fr/freslon/>

## Adress

Université Paris-Sud XI  
CNRS UMR 8628  
Institut de Mathématique d'Orsay – Bâtiment 307  
91405 Orsay Cedex  
FRANCE

## Positions

- **Maître de Conférences** Orsay, France  
*Université Paris-Sud XI* 2015 - present
- **Post-doctoral researcher** Saarbrücken, Germany  
*Universität des Saarlandes* 2014 - 2015
- **Ph.D. student** Paris, France  
*University Paris VII* 2011 - 2014

## Education

- **University Paris VII** Paris, France  
*Ph.D. in Mathematics* 2011 - 2014  
— Advisor : Étienne BLANCHARD
- **École Normale Supérieure** Paris, France  
*Studies in Mathematics* 2007 - 2011
- **Preparatory classes** Tours, France  
*Preparation for competitive exams to enter "Grandes Écoles"* 2004 - 2007

## Degrees

- **Ph.D. in Mathematics** Paris, France  
*University Paris VII* 2013  
— Title : Approximation properties for discrete quantum groups
- **Master in Mathematics** Paris, France  
*University Paris VII* 2010  
— Advisor : Étienne BLANCHARD
- **Agrégation externe de Mathématiques**  
*Competitive exam giving a position in the public education system* 2009

## Publications and preprints

17. *Quantum reflections, random walks and cut-off*, preprint (2018).
16. *Cut-off phenomenon for random walks on free orthogonal quantum groups*, preprint (2017).
15. *Torsion and K-theory for some free wreath products* (with R. Martos), to appear in *Internat. Math. Res. Not.* (2018).
14. *On two-coloured noncrossing partition quantum groups*, preprint (2017).
13. *Modelling questions for quantum permutations* (with T. Banica), to appear in *Infin. Dimens. Anal. Quantum Probab. Relat. Top.* (2018).
12. *The radial MASA in free orthogonal quantum groups* (with R. Vergnioux), *J. Funct. Anal.* **271** (2016), n° 10, pp. 2776–2807.
11. *Wreath products of quantum groups by finite groups* (with A. Skalski), *J. Noncommut. Geom.* **12** (2018), n° 1, pp. 29–68.
10. *On the partition approach to Schur-Weyl duality and free quantum groups* (with an appendix by A. Chirvasitu), *Transform. Groups* **22** (2017), n° 3, pp. 707–751.
9. *On bi-free de Finetti theorems* (with M. Weber), *Ann. Math. Blaise Pascal* **23** (2016), n° 1, pp. 21–51.
8. *Permanence of approximation properties for discrete quantum groups*, *Ann. Inst. Fourier* **65** (2015), n° 4, pp. 1423–1436.
7. *Fusion (semi)rings arising from quantum groups*, *J. Algebra* **417** (2014), pp. 161–197.
6. *On the representation theory of partition (easy) quantum groups* (with M. Weber), *J. Reine Angew. Math.* **720** (2016), pp. 155–197.
5. *Graphs of quantum groups and K-amenability* (with P. Fima), *Adv. Math.* **260** (2014), pp. 233–280.
4. *CCAP for universal discrete quantum groups* (with K. De Commer and M. Yamashita and an appendix by S. Vaes), *Comm. Math. Phys.* **331** (2014), n° 2, pp. 677–701.
3. *Examples of weakly amenable discrete quantum groups*, *J. Funct. Anal.* **265** (2013), n° 9, pp. 2164–2187.
2. *A note on weak amenability for reduced free products of discrete quantum groups*, *C. R. Acad. Sci. Paris Ser. I*, **350** (2012), n° 7–8, pp. 403–406.
1. *Approximation properties for discrete quantum groups*, Ph.D. Thesis (2013).

## Languages

French (native), English (fluent), Spanish (read), basics in Latin and ancient Greek.
