Erratum to
“Localization on quantum graphs with random edge lengths”
by F. Klopp and K. Pankrashkin

The results of the paper concerning the case $\alpha < 0$ are not justified. In fact, there is a mistake of computation, and the expression for $K_\Lambda(l^\omega, E)$ given at the bottom of the page 109 is wrong and should be read as

$$K_\Lambda(l^\omega, E) := \sqrt{-E} \sum_{e \in \Lambda} \tanh l^\omega_e \sqrt{-E} l^e,$$

which influences all the subsequent estimates. Furthermore, the inequality in the first displayed formula on the page 110 must be inversed.

The results for the case $\alpha > 0$ are not concerned.

We thank Mostafa Sabri who pointed out the mistake.
